

a **NUCOR** company

With over 30 years' experience, Nucor Building Systems understands the diverse needs of the modern warehouse and logistics industry. Whether you need 1,000,000 sf or 10,000 sf, from heated or unheated, to refrigerated or strictly climate controlled, the configuration and expansion capabilities of our custom metal buildings are endless, making them the perfect solution for your new facility.

We offer a full range of metal building framing options, industry-proven roof panel systems, attractive wall panels, insulated metal panels, energy-saving prismatic skylights, innovative mezzanines, and multiple building accessories. Our systems also utilize green building materials which can help lower total operational costs, while other features or specialty equipment can be incorporated to increase your building's safety and performance.
